Angkor Ascension 2012 – Interview

Brahmajarn Mohana

Can you please give us a brief description about yourself including:

What is your background?

What have you studied?

Who are you?

I am a siam reiki master teacher and have been on a spiritual journey since the age of 19, exploring meditation for over 10 years and other metaphysical works before coming into reiki, intergating what I knew theoretically with my experiences in reiki over the years. I am part of the group of lightworkers who are the freedom keepers of the ascension flame on this planet.

What is your spiritual connection to Angkor Wat?

Angkor is a for me an exploration and remembrance of the truth that existed since time began on earth. I feel there is unlimited and infinite amounts of history and information of the secrets of the stars/constellations in angkor that humanity can access, if coming from the true integrity of their heart.

What is the good side of that connection?

The good side of the connection is that human beings can still have access to ancient knowledge available from the connection to the angkor site and download this information once they reach a higher consciousness to remember the wisdom of the light.

What is the bad side of that connection?

The bad side is that because this information is available on site to be tapped into from groups of well meaning , spiritual seekers, it can be utilised by many who may not have high integrity and thus have other kinds of beings or dark intentioned beings tapping into fellow human beings who are not aware of this imprint/implant in their bodies. This creates chaotic minds and hearts and a sense of displacement as well as unexplained diseases.

Can you give me a brief description of your understanding of the energy at Angkor Wat?

The energy at Angkor is to me a complete alignment of other star systems which map pieces of the puzzles into one whole. Each constellations brings with it, its own wisdom, love and mastery and Angkor is a concentrated location of all the pieces of the puzzles merging into one. It is an energy of remembrance, of unity and the foundation that was put on earth to be the solid grounding of high levels of light manifested into physical reality.

What do you feel you can bring to this experience that you would like to share with others?

I feel that I will bring to the experience my own unique piece of the energy and light that is needed to piece together this beautiful picture on earth, with all the other lightworkers present for this ascension tour, bringing in their own unique pieces as well, to merge together from different directions the energies needed for our beautiful planet in years to come .

What do you hope to achieve at Angkor 2012?

Personally?

I hope to achieve the successful intergration of the light in to our planet for the support of not just for myself on the healing path, but for all of humanity and for our dear earth with deep love and gratitude. I hope to achieve a gathering of wisdom and for what we begin and create at Angkor to spread far and wide into every home, country and space for humanity's evolution and to support these changing times as it will not always be smooth , there will be rocky moments. People and the earth will need these reserves of strength, courage and intergity to move past their misgivings and move forward to the mastery of themselves.

Yes, - as this seems to be the time of : “ harmony through conflict “ I understand that the harmony would come after the conflict within and outside, where we will need to confront our own darkness and reach for the light in any way we can. Word of advice : do not take anything personally ! Let what needs to happen, happen and let others go along their merry way no matter how attacked you feel. :-)
